

HSM

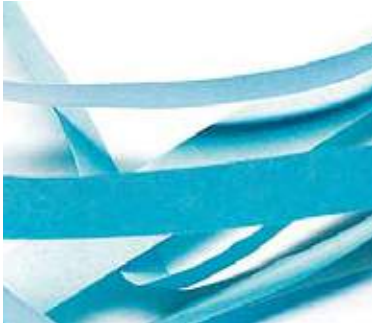

Cardboard shredders HSM

HSM cardboard shredders are the optimum solution for all despatching and warehouse areas. They instantly convert bulky used cardboard containers of goods delivered into an all-purpose and first of all free packaging material.

The advantages:

- Cutting and perforation in one cycle
- Hardened cutting rollers, made from a single piece, are completely resistant to damage from paper clips and other soft metal items
- Special geometry of cutting rollers guarantees even, optimum padding of the material - thus extending service life
- Sturdy housing made of sheet steel specially designed for use at the despatching area
- Measuring scale allows to quickly measure the width
- Generously proportioned working table ensures comfortable and simple operation
- The shredders meet all national and international safety standards
- Excellent price-/performance ratio

The security levels (according to DIN 32757-1)

Security level 1 – strips

Security level 2 – strips

Security level 2 – particles

Security level 3 – strips

Security level 3 – particles

Security level 4 – particles

Security level 5 – particles

HS Level 6 – particles

**Cardboard shredder HSM ProfiPack 400,
flexible tabletop machine**

Powerful tabletop machine is portable and flexible in use and especially space-saving thanks to its compact size. Thermal fuse protects the motor from overheating. AC power connection. On/Off and Reverse rocker switch for easy operation.

Order number	Infeed height in mm	Cutting capacity	Cutting speed in m/min	Weight in kg
1528 124	10	1 layer	8	37.2

Dimensions (WxDxH): 590 x 370 x 360 mm, colour: light grey.

4 kW

425 mm

3 x 400 V
50 Hz**Cardboard shredder HSM ProfiPack 425,
mobile standing machine**

Multi-functional standing machine has rollers for mobile operation. Its large motor provides high throughput speeds and power reserves - which means it has no problems handling multiple layers. Thermal fuses on all three phases protect the motor from overheating. 3-phase power connection. Rotary switch with the positions On/Off and Reverse for comfortable and easy handling.

Order number	Infeed height in mm	Cutting capacity	Cutting speed in m/min	Weight in kg
1531 144	20	2 - 3 layers	12	175

Installation and training

Dimensions (WxDxH): 700 x 480 x 970 mm, colour: light grey.

Installation and training

Dimensions (WxDxH): 700 x 480 x 970 mm, colour: light grey.

EMCS (energy management and control system) – dealing with energy in a sensible manner.

- *Automatic shut-down function: The SECURIO automatically switches to energy-saving mode 2 minutes after use, i.e. all unnecessary electrical consumers are switched off or their consumption is reduced and you save up to 30%. If you now feed the shredder with paper, it will automatically switch on again.*
- *Automatic switch-off: The SECURIO switches off completely if it is not used for 1 hour. As a result, no valuable energy is wasted at night or at the weekend (zero consumption). The SECURIO is immediately operational again at a press of the elegant control key.*
- *Temporary mode: To shred small pieces of paper, credit cards or foils, press the control key for only 2 seconds – the SECURIO runs for 10 seconds and then automatically switches to stand-by.*
- *Permanent mode: For large quantities of paper and documents, the control key is pressed for 4 seconds and the SECURIO is activated for continuous operation. The machine automatically returns to the stand-by mode when the operation is completed.*
- *Save energy: the EMCS intelligent energy management saves you up to 90% power consumption compared to a standard stand-by switch. The SECURIO B22 model is equipped with a ZES (zero energy stand-by), which means it does not consume any power in the stand-by mode.*
