HSM®

Great Products, Great People.

Creating your own packaging material from cardboard is economical and ecological

The packaging machines HSM ProfiPack C400 and P425 turn used cardboard into universal packaging material in the blink of an eye.

The HSM ProfiPacks stand out due to:

- One work process to cut and perforate – no time is wasted cutting the cardboard to size.
- The hardened cutting rollers are manufactured from one piece of steel and are therefore completely impervious to staples and similar soft metals.
- All models have a single-phase plug.
- The patented geometry of the cutting units and the robust bearing plates ensure a long operating life and guarantee that the material is evenly bolstered up.
- The sturdy housing made of sheet steel was developed specially for robust operations in the incoming goods department.
- A generously sized support table ensures comfortable, easy handling.
- All national and international safety regulations are met.
- The HSM ProfiPack packaging material machines have an excellent price-performance ratio.

Creation of padding mats (one layer of cardboard, HSM ProfiPack P425).

Creation of compressed packaging material with a closed compression flap (two layers of cardboard, HSM ProfiPack P425).

HSM ProfiPack – easy and flexible

The measurement scale enables the material width to be adjusted easily as required.

Cutting and bolstering in one work process.

The packaging material can be used wherever required and provides an optimum protection for objects – as padding mats, padded packaging or to fill up empty spaces.

Are you looking for a clever solution to pack different products flexibly and safely?

Why buy new packaging material when you have old cardboard boxes?

HSM ProfiPack turns your old cardboard into high quality packaging material!

Be aware:
Cardboard is a valuable raw material and should not just be thrown away.

From waste to packaging material

The HSM ProfiPack packaging machines are a brilliant solution for all shipping and storage areas. They perforate and bolster up used cardboard and make universal packaging material which is as good as new. This saves costs and, at the same time, is a sensible and practical contribution to environmental protection.

Perfectly packed – with HSM ProfiPack: safely pack different objects easily and save time as well.

Packaging machine HSM ProfiPack C400

sales@getpacked.com.au

Small in size – hugely effective! With this packaging machine, you can turn cardboard into a padding mat or padded filling material in one work process. As a compact tabletop device, it can be used as a mobile device with total flexibility.

- High quality materials and “Made in Germany” quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Powerful drive allows continuous operation.
- Adjustable cushioning volume of the packaging material.
- Infinitely adjustable working width with measurement scale for packaging material made to measure.
- Intuitive operation with LED indicators on robust keypad.
- The integrated turbo-function resolves blockages.
- Recessed handle for easy lifting of the device.
- Non-slip stand.

Intuitive operation

Specially hardened cutting rollers for precision cutting

Specifications

Model	HSM ProfiPack C400
Scope of application	Tabletop device
Intake width in mm	415
Infeed / Loading height in mm	10
Cutting capacity in layers	1
Cutting speed in mm/s	185
Noise level (idle operation)	59 dB(A)
Driving power in kW	1.2
Voltage / Frequency	230 V / 50 Hz
Dimensions W x D x H in mm	610 x 395 x 375
Weight in kg	39

Packaging machine

HSM ProfiPack P425

sales@getpacked.com.au

The all-rounder for universal, daily packaging tasks! This high-performance packaging machine is used to process a number of layers of cardboard into a padding mat or padded filling material. The professional device is mobile on steering rollers and can be used with total flexibility.

- High quality materials and “Made in Germany” quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Powerful, efficient drive concept allows continuous operation.
- Particularly sustainable operation due to the high efficiency.
- Fully flexible feed-in speed adjustment.
- Adjustable cushioning volume of the packaging material.
- Infinitely adjustable working width with measurement scale for packaging material made to measure.
- Intuitive operation with LED indicators on robust keypad.
- The integrated turbo-function resolves blockages.
- User safety through emergency off switch.
- Mobile on castors, with parking brake.

Feed-in speed adjustable

HSM ProfiPack P425 has an optional suction device

Model	HSM ProfiPack P425
Scope of application	Stand-alone device
Intake width in mm	425
Infeed / Loading height in mm	20
Cutting capacity in layers	up to 3
Cutting speed in mm/s	235
Noise level (idle operation)	59 dB(A)
Driving power in kW	1.4
Voltage / Frequency	230 V / 50 Hz
Dimensions W x D x H in mm	770 x 570 x 1040
Weight in kg	170
