## Our Commitment to Sustainability

Each Armour Phoenix Padded Mailer Bag is made from LDPE4 and contains a minimum of 50% Recycled Content! This includes a minimum of 25% Locally Sourced Post Consumer Recycle (PCR) and 25% Post Industrial Recycle. The entire Armour Phoenix range is 100% reusable and recyclable.

Our passion for sustainable manufacturing demonstrates that we are a responsible and forward thinking organisation that is 100% committed to positive environmental change. We operate under circular economy principles and are dedicated to reducing our carbon footprint. Sancell's commitment to best practice and continuous improvement is evident through our ISO 14001 Environmental Management System and dedication to numerous environmental initiatives, including partnerships with APCO and ANZPAC Plastic Pact. Our customers can enjoy confidence that they are buying products from a business that is making real and authentic environmental change.

# Safe and Secure

To protect against weather, moisture and spills, all Armour Phoenix Padded Mailer Bags are manufactured with water-repellent LDPE4 materials. The outer layer ensures goods are safe from moisture and other elements if left unattended. Water merely runs off the surface of Armour Phoenix bags, keeping the contents dry and safe.

The robust three-layer design also makes the bags puncture and tear resistant. Along with their tamper evident seals, this makes them a safe and secure mailing solution.

## Custom Options

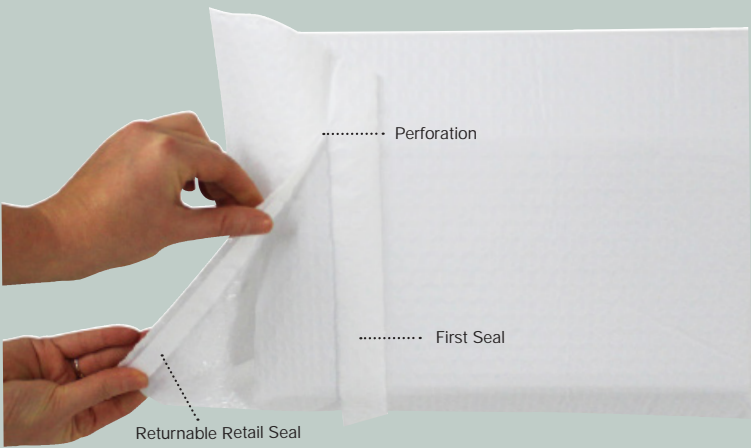

We custom manufacture Armour Phoenix Padded Mailer Bags to suit individual needs and requirements from jewellery to surfboards, we can do it all. Custom sizing ensures your mailing bag is fit-for-purpose and provides a myriad of protective benefits to both the retailer and customer alike.

Why not take it one step further by wowing your customer and distinguishing yourself from competitors with every delivery you make. Custom design a packaging solution that reflects your brand including brand colours, messaging and iconic logos.

## Returnable Retail Seal

This unique packaging solution gives customers and retailers a well defined, easy-to-use return option that is convenient and eco-friendly.

Online retailers that have been able to streamline the returns process have seen more repeat business and overall more satisfied customers. Supplying all purchases in a returnable bag ensures customers are not expected to source packaging for the return of unwanted goods.
