

ThermaWeave

Pallet Covers

With superior strength and proven thermal performance, ThermaWeave Pallet Covers will save you time, space and minimise your carbon footprint.

Pallet Covers fold down to 0.01m3 saving space and storage costs

Save costs by lowering the need for refrigerated transport

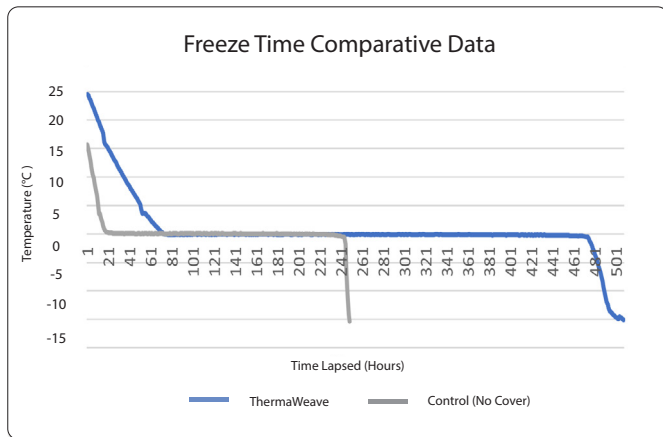

ThermaWeave is reusable and reduces your carbon footprint

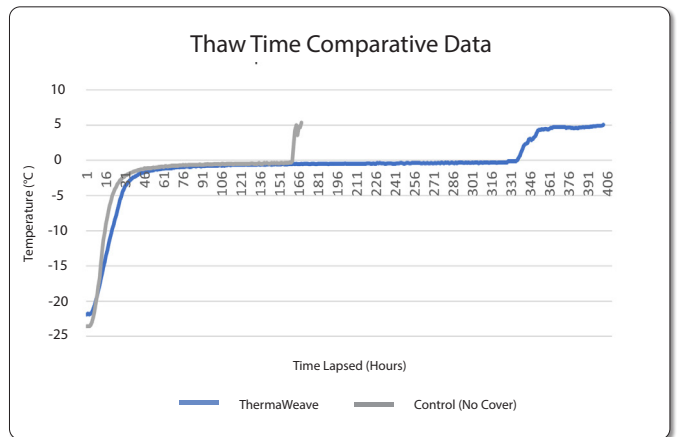

Performance

Our in-house testing proves consistency in thermal performance of our Pallet Covers. Not only will ThermaWeave protect your goods with its superior strength, it will also maintain desired temperature over a set period of time.

* Pallets are placed in a container freezer set to -25°C. Test ended when product reached -15°C.

* Frozen 500lt Pallecon filled with water with Pallet Covers on them, removed from freezer and placed in warehouse.

Why Pallet Covers?

- ✓ High quality Covers provide maximum strength and protection to ensure your goods arrive in tip top condition
- ✓ Validated thermal performance
- ✓ Easy to use and suitable for reuse again and again
- ✓ Space saving and cost effective
- ✓ Custom sizing available
- ✓ Made in Australia and manufactured under an ISO Quality, Safety and Environmental Management System
